

# ORACLE HOSTING SOLUTIONS

**CUT COSTS AND SAVE TIME  
WITH CUSTOM ORACLE HOSTING**

## INTERNAL ORACLE MANAGEMENT ISN'T COST EFFECTIVE

### Leader in Advanced Oracle Hosting

Databerry has been a leader in Oracle and Oracle related technologies hosting. From being one of the first companies to offer Oracle Cloud Services ranging from Oracle 10g and APEX hosting to Oracle 11g and Oracle Web Logic Server, we are proud to be the industry leader in database hosting.

### Superior Support

No matter how good your services are, your business will not survive if you do not have a strong support system. Databerry understands this principle. This is why we do not rely on call centers for our support staff. Our staff is completely comprised of highly skilled IT professionals with years of industry experience. Also, our support staff is 100% based in the USA and available around the clock 24/7/365!

### Stability and Reliability

Databerry made the decision to never cut corners when it comes to the managed network infrastructures and hosting services. At Databerry we partner with the best Hosting companies to provide a high level of Service for Oracle hosting second to none. This allows for a higher standards then running one Datacenter and allows for true Disaster recovery by multiple locations with multiple carriers and multiple hosting companies for no single point failures.

## **INTERNAL ORACLE MANAGEMENT ISN'T COST EFFECTIVE (continued)**

### **Hardware and Software**

- + No more Hardware costs and/or Software license fees.
- + The latest software and hardware at your fingertips at no additional cost!
- + Flexible budget and no unexpected licenses or hardware costs for upgrades!
- + On demand virtual servers! Provides you with redundancy and peace of mind!
- + Software and hardware asset management no longer required! No need for inventory control (we manage it for you so you don't have to).

### **Managed Services: Backup & Recovery**

- + No more Additional IT staff and data loss/downtime
- + A unique IT environment built & customized to meet your specific needs! Supports end-user devices, provides online reporting tools, trouble ticket system, & you can select between our 24/7 with SLA(Service Level Agreement) or 9/5 on call options!
- + Backup your server files and configuration data! Prevent loss of data due to theft, hardware failure, or accidental deletion! Quickly recover lost data!
- + Install, customize, and scale any applications that your business needs in a private, secure, and dedicated server environment!
- + View and control all PCs and devices in a centralized location to reduce cost, increase uptime, and align your IT Security policies with the overall strategy of your business!
- + Fully managed hardware based firewall and load balancing service to protect your business from both inbound and outbound security threats, monitored 24x7x365!

## EXPERIENCE THE DATABERRY DIFFERENCE

### Benefits Include:

- + No need for additional IT staff or free up IT Staff while shifting the workload from maintenance to strategic projects and initiatives.
- + 24x7x365 Live Support & Expertise with SLA's(Service Level Agreements)  
Immediate Response to Emergency Support Tickets
- + Reduced licensing costs make your capitol work harder for you by leasing Oracle licensing direct from us as needed
- + Reduce costs with no Server hardware or Server software, better utilization, increased operational efficiency, and lower capital investments (Oracle licensing may incur additional costs)
- + Heightened Business Agility gives you the ability to dynamically scale operations, accelerate business innovation, and reduce time to market
- + Reduced costs in development and production environments with virtualization, scale when additional resources are needed with no down time, and avoid additional investment costs when scaling your applications.

## **THINGS TO CONSIDER WHEN CHOOSING A HOSTING COMPANY**

### **Trust Only Experienced Hosts**

Experience is everything in the Oracle Hosting business. Ensure that you hire a hosting company with a reputation for employing qualified experts with a track record of excellence and longevity in order to avoid service interruptions or otherwise avoidable data loss.

### **Not All Developers Are Created Equal**

Look for companies that hire developers with 5-10+ years of development experience. Choosing a company that employs the lowest bidder can increase the initial learning curve and drive costs upwards of to 2 to 3 times the quoted budget required for your project.
